Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15 are, drawn to combination beverage container and compact disc, classified in class 206, subclass 217.
 - II. Claims 16-18 are, drawn to a compact disc, classified in class 206, subclass 308.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because claims 1, 12 and particularly claim 15 do not include parameters of the subcombination, e.g., a tray permanently attached to the protective housing (claim 18). The subcombination has separate utility such as a case used independently of the beverage container or a case attached to other containers.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
